

From Data to Action

STRATEGIC PLAN 2024-2027

OUR VISION:

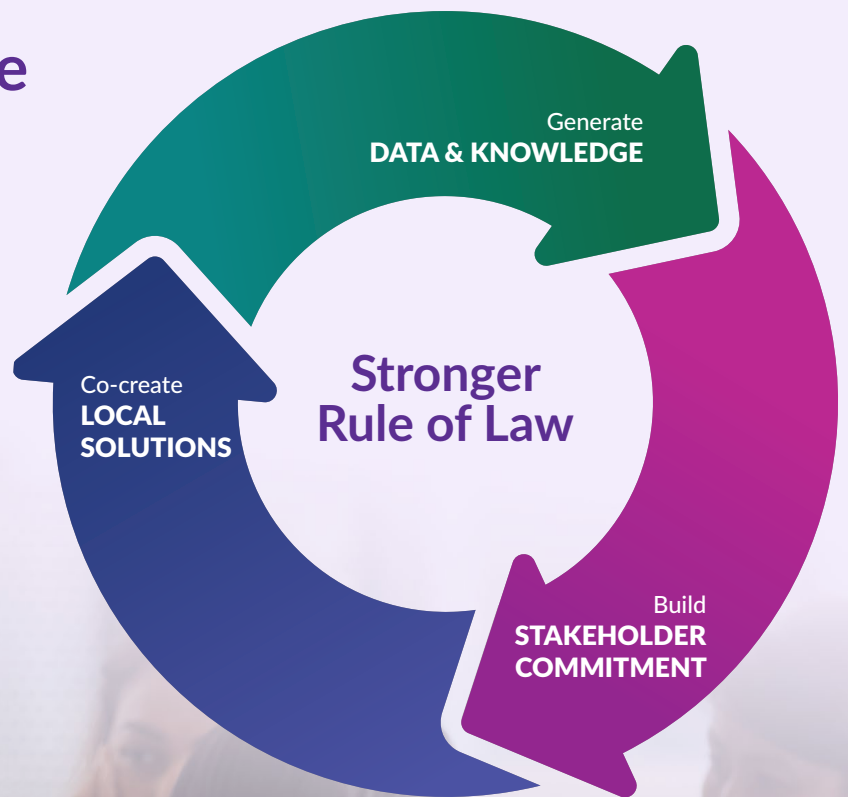

A world of rule of law communities that deliver justice, opportunity, and peace.

OUR MISSION:

To build knowledge, generate awareness, and stimulate action to advance the rule of law.

Our Theory of Change

WJP has a 15-year history of excellence in raising awareness of the meaning, measuring, and mattering of the rule of law. Now, we will prioritize using our data and knowledge to drive policy change and rule of law progress at the local and national level.

Our Approach

To strengthen the rule of law:

- › **We produce and disseminate rigorous, people-centered data and knowledge** to evaluate rule of law performance, generate stakeholder commitment, and inform effective policy making.
- › **We stimulate academic research and rule of law education** that expand the global rule of law knowledge base and inspire future generations.
- › **We support local and national champions**—through convenings, knowledge exchanges, technical assistance, and collaborative policy processes—and document successful approaches to advancing the rule of law.

Our programs will turn our flagship research products and strategic convening events into action in three priority areas:

Government Accountability

Goal: Help governments and civil society strengthen checks on government powers, expand open government, and protect human rights.

Roll back authoritarian trends

People-centered Justice

Goal: Empower justice systems to embrace a people-centered approach.

Close the global justice gap

Environmental Rule of Law

Goal: Build a critical rule of law foundation for effective environmental protection and governance.

Protect the planet
